World's Smartest Mobile Diabetes Care Solution

Bluetooth®
Wireless

MyGlucoHealth Wireless transmits
glucose readings via mobile phone for
sharing, review and analysis.

Smarter Diabetes Management for a Digital Lifestylesm

MyGlucoHealth is an intelligent diabetes management platform providing comprehensive tools for patients, clinicians and caregivers to improve lives and lifestyles.

MyGlucoHealth® Wireless is the world's first integrated Bluetooth-enabled blood glucose meter. With the smallest blood sample size (0.3µL), automatic coding and results in just 3 seconds, the MyGlucoHealth Wireless meter is the most technically advanced diabetic care product on the market today.

MyGlucoHealth Wireless along with the MyGlucoHealth Network offers a comprehensive diabetes management platform that gives clients more direct control over their care, while providing enhanced communication with their clinician, family and caregivers.

MyGlucoHealth Wireless works in combination with a real-time online data collection network to upload and report patient blood glucose readings. Using the MyGlucoHealth Network at www.cambiumwellness.net, clients can transmit, review and evaluate their daily readings while communicating those same readings automatically to their clinician or caregiver. This allows clinicians to stay up-to-date on clients and intervene immediately if necessary.

The MyGlucoHealth Portal is an extensive communication and data management web site that provides an easy-to-use interface for automatically collecting test results from the meter. Stored results are wirelessly transmitted by mobile phone or PC to the Portal for posting. This is performed automatically using Bluetooth technology or by connecting a USB cable directly to the meter. The direct upload process eliminates manual logging of test results, improving accuracy, providing better access to critical data and removing the opportunity for mistakes or erroneous entries.

Make Better Lifestyle Choices

On the MyGlucoHealth Portal, readings are charted and interpreted in a number of ways to best analyze and evaluate blood glucose data. The Portal is designed to help each user take "ownership" of their disease, so they can make more effective lifestyle choices.

Reminders, Messages & Alerts

Test, Upload, Manage...Live!sm

MyGlucoHealth Wireless

- World's first FDA-cleared Bluetooth® blood glucose meter
- Smallest sample size: 0.3 microliters
- Fastest testing: 3 second results
- Auto-coding
- Alternate site testing
- Plasma-calibrated
- Add blood to test strip for up to one minute
- Easy-to-read display, large clear buttons
- Price of meter and strips comparable to non-connected meters.
- Test Range — 10-600 mg/dL
- Power Source — 3 V (2 standard AAA alkaline batteries)
- Battery Life — 2,000 Tests

A Wireless Connected Care Solution

Connect to a mobile phone or PC
Transmit readings to the Internet
Share, review and analyze your data
Receive emails, alerts and reminders
Stay connected and in control
